

I am writing to you to urge you to not give LPFM priority over FM translator service. I am writing this because the broadcast of K-LOVE in my community is so important to me and many others in our community. I live in a small, rural community in western Nebraska and we do not have a large choice of radio stations. When I discovered K-LOVE I was thrilled to be able to receive their message in my car, my home, and at work. Many of my friends and acquaintances get a great deal from having KLOVE broadcast in our community. KLOVE broadcasting is an important service to offer a positive alternative to those of us that want something other than the basic pop, country, or oldies stations available to us. The service and message provided by KLOVE is invaluable. It helps me get through some of my toughest days and I hate to imagine my days and nights without it.
